

AGENDA
HISTORIC PRESERVATION / DESIGN REVIEW COMMISSION

Wednesday, August 14, 2013 – 4:30 PM

City Conference Room – County-City Building
1515 Strongs Avenue – Stevens Point, WI 54481

(A Quorum of the City Council May Attend This Meeting)

Discussion and possible action on the following:

1. Approval of the report from the June 5, 2013 and July 16, 2013 HPDRC meetings.
2. Request from Marty and Kelly Kizewski for design review of exterior façade improvements and signage at **1008 Main Street (Parcel ID 2408-32-2029-20)**.
3. Request from Jeff Brown for façade improvement grant funds in the amount of \$10,389.60 and design review for exterior building work at **1140 Clark Street (Parcel ID 2408-32-2026-32)**.
4. Request from Mark Grubba, representing M&C of Stevens Point LLC, for façade improvement grant funds in the amount of \$25,333.00 and design review for exterior building work at **949 Main Street (Parcel ID 2408-32-2018-01) and 937 Main Street (2408-32-2018-02)**.
5. Determination of Eligibility (DOE) submission of potential historic districts or sites to the Wisconsin Historical Society regarding the Business 51 road reconstruction project.
6. Adjourn.

Any person who has special needs while attending these meetings or needs agenda materials for these meetings should contact the City Clerk as soon as possible to ensure that a reasonable accommodation can be made. The City Clerk can be reached by telephone at (715)346-1569, TDD# 346-1556, or by mail at 1515 Strongs Avenue, Stevens Point, WI 54481.

REPORT OF THE HISTORIC PRESERVATION / DESIGN REVIEW COMMISSION

Wednesday June 5, 2013 – 4:30 p.m.

City Conference Room – County-City Building
1515 Strongs Avenue, Stevens Point, WI 54481

PRESENT: Lee Beveridge, Alderperson Mary Stroik, Tim Siebert, and, Kathy Kruthoff (George Hanson excused).

ALSO PRESENT: Director Michael Ostrowski, Economic Development Specialist Kyle Kearns, City Attorney Logan Beveridge, Alderperson Tony Patton, Cathy Dugan, Bill Schierl, Carrie Butt, and Elizabeth Aquillera.

INDEX:

Discussion and possible action on the following:

1. Approval of the reports from the April 3, 2013 and April 10, 2013 HPDRC meetings.
2. Request from Bill Schierl, representing the Arts Alliance of Portage County, Inc, for a contemporary street art mural on the west facing wall of Dive Point Scuba, 944 Main Street **(Parcel ID 2408-32-2015-15)**.
3. Façade Improvement Grant Program Update.
4. Adjourn.

-
1. Approval of the reports from the April 3, 2013 and April 10, 2013 HPDRC meetings.

Motion by Commissioner Siebert to approve the reports of the April 3, 2013 and April 10, 2013 meetings; seconded by Commissioner Kruthoff. Motion carried 4-0.

2. Request from Bill Schierl, representing the Arts Alliance of Portage County, Inc, for a contemporary street art mural on the west facing wall of Dive Point Scuba, 944 Main Street **(Parcel ID 2408-32-2015-15)**.

Commissioner Beveridge stated that we have all read the proposal, and understand the thinking, but the request does violate the guidelines, however several things have been presented in the past that don't meet guidelines.

Bill Schierl asked if the guidelines referred to were the 2008 centennial and the purpose of the murals, to which Commissioner Beveridge stated yes, those are our guidelines and we had created them at the time when the murals seemed like a good project. Commissioner Beveridge pointed out this is very different and evokes lots of different opinions and attitudes.

Commissioner Siebert stated he opposes this even though he understands were the idea is coming from, but he feels it looks like graffiti, and pointed out the examples in the packet which

appear scary to him. When asked by Elizabeth Aquillera if it was the style or the content that he opposed, Commissioner Siebert answered both.

Bill Schierl explained it started when he went to an exhibit at the Center for the Visual Arts in Wausau where they had done graffiti art in a skateboard proof which was extremely popular. He continued in conversations with Carrie and Bob Butt regarding the wall of the building as a place for a mural. This would allow the creation of a space for contemporary younger artists to show their work and to create interest. His hope is that the wall is continually changing and that it isn't about graffiti, but hopefully the goal of having real artists who do real work rather than graffiti. Furthermore, he pointed out the wall is currently in poor shape. Mr. Schierl continued stating that he and Elizabeth went to downtown property owners to obtain feedback regarding this project. Business and property owners that would typically look at the wall are in favor of it and many have a positive impression of the art, especially rather than the current wall.

Elizabeth Aquillera stated she poled the other end of the street and the majority said yes to the graffiti mural, showing much excitement and interest.

Commissioner Beveridge asked if this could be broken down into different things rather than just street art, such as different divisions, to which Mr. Schierl answered possibly. Commissioner Beveridge added, he loved the colors and thinks the images are intriguing, but there are people who will not understand it at all. Mr. Schierl pointed out that some people don't understand the Sculpture Park or traditional photos. The concept of not knowing the history of the sculpture or mural and the requirements is simply a misconception for this wall not necessarily fitting into the existing mural context, but rather just a place to beautify the building and expand the art scene.

Elizabeth Aquillera explained you are speaking to people that you are not going to reach with the historic murals, however a lot of "smaller town" downtowns in Wisconsin are starting to pursue the same thing. The other end of Main Street has a skate shop, Energy Café and a clothing store called "Identity" which are all of a different generation and style, whose customers may enjoy this type of art.

Carrie Butts added if you go to Google images and type in the word graffiti you will see a lot of pictures of amazing art. Often times the words graffiti is often times associated with bad art. Commissioner Beveridge added he does not think it applies to this.

Commissioner Siebert asked how frequently the wall would change, to which Mr. Schierl answered that in the staff report the recommendation is for an approval process. Initially however, the concept was to be as free as possible, allowing changes to the wall to occur at artist's choosing. Profanity, inappropriate imagery, sexual content, violence, racial slurs, and political gang messaging would be blacked out. He continued that this art is not something that someone is going to complete in an hour; the proprietors of the building will have some control and connection with the artists. Commissioner Beveridge did point out there will be taggers out

there and pieces of art will be painted over, as well as potentially nearby buildings. Mr. Schierl asked if there has been graffiti damage to the existing murals, to which Commissioner Beveridge answered he thinks they are boring enough that kids are not interested. He then added this will draw the right people to come and appreciated it, but at 3am someone with a spray can may be tempted to use it. Mrs. Butt stated they are willing to put a video camera on this side of the building and more lighting if allowed. One currently exists on the front of her building.

Commissioner Kruthoff feels the art is refreshing; the murals in the past are historic, and they have met a certain need. Furthermore, this proposal meets another kind of need for the arts which should be approved by the committee, as changes to paint can be reversed.

Commissioner Siebert asked who is to determine that renderings are disturbing, to which Mr. Schierl answered art would be based on the criteria of profanity, inappropriate imaging, sexual content, violence. Mrs. Butt interjected that if there was something vulgar she would be out there right away covering it up. Commissioner Beveridge also pointed out that the staff report included bringing a rendering through the committee for review, to which Mr. Kearns clarified it was a staff recommendation. Mr. Schierl asked if approval of contemporary images changing was really needed, as a code exists among artist to respect each other's work and create appropriate images. He continued stating he is on the Sculpture Park committee and there has only been one vandalism issue.

Kyle Kearns Economic Development Specialist asked Mr. Schierl to provide more detail as to how going about enforcing the time in which artists art are allowed to be displayed, before being painted over. Mr. Schierl answered that his understanding is in major metro areas unless artists bought the wall there is no control of time frame. Mrs. Butt added they will play that by ear, and see if they get a waiting list of people to paint the wall which may encourage the creation of a schedule. Adperson Patton stated that initially several artists will be interested and if space is given to artists they will respect it.

Commissioner Siebert stated there has been graffiti on some of the murals.

Cathy Dugan, 615 Sommers Street, agreed there is no historical significance at this site and that is what this area is about. She continued stating the proposed area is not the appropriate place for contemporary graffiti art, but another place in town might be. Lastly, Ms. Dugan stated she is skeptical as to what type of artwork will be displayed, but would be more inclined to listen if the University Art professors were involved.

Commissioner Beveridge explained there is a trend of to ensure responsibility, enforcement, and approval, however, there is none of that involved in this project. He continued stating that he liked the idea, and agreed may be shocking to people, but the downtown is shaping up to be the Mecca of the young; there is no other place.

Alderson Patton asked if there is anything in our ordinance that regulates façade painting, to which Commissioner Beveridge stated yes, they have to have prior approval from the Historic

Preservation/Design Review Commission and they can paint the wall a solid color if it is approved by the commission from a historic palette.

Commissioner Kruthoff stated the way the downtown is shaping up, with the arts walk and studio adjacent to the river, the mural is a unifying factor that brings in another view point. Alderperson Patton added, like the skateboarders needed their place, maybe the graffiti artists need one as well, and if someone is willing to give up a wall of their building, it might be worth it. Furthermore, a temporary approval can be given, allowing for a trial period where the committee has the chance to end the project.

Commissioner Kruthoff asked if there was anything that prevents us from requiring a review before something is put up. Mrs. Butt commented that she purchased the building in 1999, during which discussion occurred with city planners that a mural portraying a scuba diver, kayaker, and a rock climber was a concern because it may be advertising, even though she explained it portrays residents of Central Wisconsin. It was never pursued due to financing.

Commissioner Beveridge asked if this was going to be shepherded by the Arts Alliance, to which Mr. Schierl explained they would put out a call to artists, and because it is new to the Alliance, they do not want to have restrictive barriers. Elizabeth Aquillera added this also is the only place where you can just walk down the street and see art being made. Commissioner Beveridge stated the commission does understand what is being proposed, but unfortunately, the Commission is not part of the art community, and some of these things can be interpreted in many different ways. The commission is looking for some way to approve this but have some idea of what is going to happen.

Commissioner Kruthoff asked if they had reviewed the staff recommendations, to which Mr. Schierl stated yes and he does not have a real problem with them. Mr. Kearns added the reason those staff conditions were placed on the approval is because the historic guidelines do not typically allow the painting of brick and it is frowned upon by the state's Historical Society. Mr. Schierl explained with the control question, the worst case scenario is that the wall just gets painted grey if the project is rejected in the future. Alderperson Patton added most of the designs would occur during the summer and whatever is put up in November would probably be there all winter. Mr. Schierl added that a timeline for this really has not been discussed with the owners or anyone else. Commissioner Beveridge asked what the time line would potentially look like, to which Mr. Schierl answered we would have to work through the process of prepping the surface, posting signage and rules, as well as, getting in contact with street artists to get involved; a couple of months or even by fall.

Alderperson Patton stated as an Alderperson he supports it and believes in its success with MSTC coming downtown and bringing younger people to the area.

Carrie Butt asked if the staff recommended conditions would take care of the concern about control, to which Commissioner Beveridge answered we were told there would be no

renderings beforehand. Commissioner Beveridge then asked if prepping the wall would include painting it a solid color prior to the art, to which Mr. Schierl answered he doesn't know.

Alderson M. Stroik asked if renderings will be done because it may hinder the creativity of the process, to which Mr. Schierl stated the Art Alliance does not want to put itself in the position of judging art.

Commissioner Beveridge asked Director Ostrowski if there was any graffiti problems downtown, to which he answered yes. Graffiti through was found by the library on the murals, on the former Player's Lounge, as well as the Cooper Motors and Shopko last year. However, there was not a specific focus to the downtown area.

Cathy Dugan added that regarding oversight, all art should come before the commission, as described in the staff report. Commissioner Beveridge stated it has been explained during this meeting that art is not going to be controlled and will happen over a period of time. Commissioner Beveridge asked the representatives to get back to the commission regarding answers to some of the concerns and see if there is anyone in the arts league who would have any additional comments or recommendations about control or safety to surrounding buildings. Mr. Schierl stated that if the expectation is for the Arts Alliance is to control those issues, then they will withdraw the proposal as they do not want to be a part of judging art.

Commissioner Siebert pointed out one of the issues is the inappropriate stuff; who will then paint over it, to which Carrie Butt stated she can keep paint to cover it up. Director Ostrowski added if there is any inappropriate language, gang signs, or imagines there is a graffiti ordinance that would require it to be repainted within 10 days by the property owner.

Alderson Patton stated he feels the commission should let it happen with a review process in place, similar to a trial period. Commissioner Beveridge added we are here to protect the image of downtown, and this request is just different.

Motion by Commissioner Kruthoff to approve a contemporary street art mural, on the west facing wall of Dive Point Scuba, 944 Main Street (Parcel ID 2408-32-2015-15) with the following conditions:

- **Proposed artwork shall not display inappropriate language, phrases, pictures, or gang signs.**
- **Artwork shall be limited to the southern half of the western building façade. The northern half shall remain unpainted brick.**
- **Renderings of proposed artwork shall be submitted for review by the Commission Chairperson and designated agent prior to painting to ensure conditions are met.**
- **If the Contemporary Street Mural Program shall ever cease, the applicant and/or owner shall be responsible for restoring the wall with a neutral paint color at any time in the future if decided by the Historic Preservation/Design Review Commission.**

Seconded by Alderson M. Stroik.

Commissioner Kruthoff continued stating she understands both side of the review argument, but feels the comfort level of the community, area, and the commission is a responsibility that we have to have. Furthermore, it doesn't mean the Commission has to have a full meeting for approving art, but our commission has to have part of that review to ensure that conditions are met. She continued stating that she trusts Mrs. Butt wouldn't approve something that was inappropriate in nature. Commissioner Beveridge added that he is still concerned an attractive nuisance will be created with this approval. Mrs. Butt added that traffic flow is in the opposite direction of this wall and in order to see it you will have to be walking. Additionally, the city Police Department has called her a few times in the past when kids have gotten on the roof, and to review her camera footage which point towards Main Street.

Amended Motion by Commissioner Kruthoff to approve a contemporary street art mural, on the west facing wall of Dive Point Scuba, 944 Main Street (Parcel ID 2408-32-2015-15) with the following conditions:

- **Proposed artwork shall not display inappropriate language, phrases, pictures, or gang signs.**
- **Artwork shall be limited to the southern half of the western building façade. The northern half shall remain unpainted brick.**
- **Renderings of proposed artwork shall be submitted for review by the Commission Chairperson and designated agent prior to painting to ensure conditions are met.**
- **If the Contemporary Street Mural Program shall ever cease, the applicant and/or owner shall be responsible for restoring the wall with a neutral paint color at any time in the future if decided by the Historic Preservation/Design Review Commission.**
- **In one year from approval, review shall occur by the Historic Preservation / Design Review Commission of the Contemporary Street Mural Program, during which the commission shall determine the programs continuation or abolishment and add any conditions to approval.**

Seconded by Alderperson M. Stroik.

Commissioner Beveridge stated he thinks we are going to end up approving something that ruins the downtown mural atmosphere. Furthermore, he requested the applicant to provide material in the future to alleviate many of the Commission's concerns. Mr. Schierl answered that internally, the Arts Alliance will have to discuss the program specifics, historic guidelines and approval process to ensure the program can be sustainable for a year.

Ms. Aquillera added the cultural center in Wisconsin Rapids just a week or two ago had a skateboard artist there talking about more contemporary art and doing a workshop with youth. Commissioner Beveridge asked staff to contact other surrounding communities to see if this has come up, and to find something similar that communities have made themselves comfortable with.

Roll Called Commissioner Beveridge – aye, Alderperson Mary Stroik- aye, Tim Siebert – abstain, Kathy Kruthoff- aye, motion carries 3-0.

3. Façade Improvement Grant Program Update.

Mr. Kearns stated the commission has been provided with the memo regarding the current funds approved for the Façade Improvement Grant. He continued stating that six projects have received approval for funding, with two complete which received reimbursement.

Mr. Kearns also provided an update on current projects, specially relating to 1225 Second Street which will not be pursuing corncob blasting as it is not allowed by the State's Historical Preservation Society. Instead, discussion has ensued to identify other non-abrasive cleaning methods. Commissioner Beveridge pointed out that multiple color patterns have been discussed for the building in order to bring out the detailing.

Mr. Kearns then discussed the Mattlin Building, 920 Clark Street, stating the solar panels have been taken off which has exposed wood trusses and steel beams. The applicant has expressed interest into extending the windows and providing transom windows up to what has been exposed. Commissioner Beveridge added the original sign on the east side of the building has also been exposed. Mr. Commissioner Seibert asked for clarification as to what was behind the solar panels, to which Commissioner Beveridge answered there had been glass block and that was taken out and stud wall was put in with some insulation.

Alderperson M. Stroik asked about Specialized Computer Systems project, to which Mr. Kearns answered it was postponed until this year because they could not do the wood work and painting prior to the snowfall.

Commissioner Beveridge asked about the funds being available for the mural that was previously talked about, to which Mr. Kearns answered he did not think the funds would assist with the painting of a mural and the materials and labor to do so. However, if the Butts wanted apply for the removal of tar and so forth, they may be a candidate for funds as the wall is visible from the right-of-way and abuts an alley.

4. Adjourn.

Meeting adjourned at 5:39 p.m.

REPORT OF THE HISTORIC PRESERVATION / DESIGN REVIEW COMMISSION

Tuesday July 16, 2013 – 4:00 p.m.

City Conference Room – County-City Building
1515 Strongs Avenue, Stevens Point, WI 54481

PRESENT: Lee Beveridge, Alderperson Mary Stroik, Tim Siebert, and, George Hanson (Kathy Kruthoff excused).

ALSO PRESENT: Director Michael Ostrowski, Economic Development Specialist Kyle Kearns, and Garrett Ryan.

INDEX:

Discussion and possible action on the following:

1. Request from Garrett Ryan for design review approval to construct a detached accessory structure within the Clark Street Historic District at **1708 Clark Street (Parcel ID 2408-32-1036-10)**.
2. Dumpster corral design within the downtown design review district, specifically relating to the area north of Main Street, between Third Street and Strongs Avenue.
3. Adjourn.

-
1. Request from Garrett Ryan for design review approval to construct a detached accessory structure within the Clark Street Historic District at **1708 Clark Street (Parcel ID 2408-32-1036-10)**.

Economic Development Specialist Kyle Kearns stated Garrett Ryan is the owner and applicant requesting to construct a detached structure; it will meet all the zoning requirements; however it is before this commission due to being within the Clark Street Design Review District.

Garrett Ryan, 1708 Clark Street, explained the 22' x 24' detached garage will be placed in the back corner of the lot, to match the existing structures as close as possible. Garage doors will be painted exactly the same, with the same distance between the doors. Material such as siding and trim will be custom painted to match the house. He continued stating the siding will be four inch wide to match the existing siding on the back of the house, and the shingles will be the same.

Commissioner Siebert asked what would be the lifespan of the material, to which Mr. Ryan answered a 30 year warranty on the paint which is an automotive paint and a 5 year/50 year warranty on material.

Arrival of Alderperson Mary Stroik 4:05p.m.

Commissioner Siebert continued, explaining his concern regarding the material getting wet and splitting. Commissioner Beveridge explained the materials that are of concern are composed of a hard board which is masonite and furthermore, the edges which go unpainted and expand.

Commissioner Hanson asked if the structure would abut the existing driveway, to which Mr. Ryan stated correct, with this location there will be very little concrete poured from what exists to where the garage is starting. He explained the location was chosen to maintain the much of the trees and landscaping existing in the yard. Furthermore, power lines have been trenched so there will be no overhead lines

Commissioner Beveridge asked if the siding on the house was wood, and was concerned with the texture of the sample provided, to which Mr. Ryan stated the house looks like wood, but he is unable to confirm due to several layers of paint. Additionally, the new proposed siding texture is customizable, and is proposed to match as close as possible to the existing principal structure. Commissioner Beveridge asked if wood siding was considered or priced for this project, to which Mr. Ryan stated it was and came out to \$6,000.

Kyle Kearns, Economic Development Specialist stated he has also researched LP SmartSide trim and siding and provided some information in the staff report regarding the engineered wood that was directly from the company's website and has not found any other comments, forums or reviews regarding the durability or longevity of it.

Commissioner Beveridge asked what our guidelines state, to which Mr. Kearns referred to page three of the staff report stating that original material should be used versus a synthetic material. Commissioner Beveridge then asked why the size of 22' x 24' was chosen, to which Mr. Ryan answered the in order to be above the flood level a larger grade would need to be reached, therefore, smaller dimensions were chosen. Furthermore, he explained the building inspector confirmed and is aware of the change and situation. Commissioner Beveridge asked what lead to the decision not to tie it into the existing attached garage. Mr. Ryan answered that increased costs, additional concrete, and the removal of trees would have resulted if attached to the existing garage.

Commissioner Beveridge asked what types of windows were proposed, to which Mr. Kearns stated vinyl are proposed. Mr. Ryan added there won't be any on the back, the side of the neighbor on the corner, or front. Additionally, an entrance door to match the doors on the house with a window will face east and then possibly one or two windows on that side same side. He continued stating there will be a lot of greenery around the structure to blend into the existing landscape. Commissioner Beveridge pointed out that the windows on the house are tall and narrow double hung, to which Mr. Ryan stated he would want the garage windows to match the house. Commissioner Beveridge continued asking if the doors were proposed to match the house, to which Mr. Ryan stated the back of the house has a more modern door with an antique look to it, which the door on the garage will most likely be steel insulated and the same color. Commissioner Siebert asked again whether wood or vinyl windows were proposed, to which Mr. Ryan answered he wants wood windows, to which Mr. Kearns added the staff recommendations are recommending wood and painted to match the home. Mr. Ryan then asked if windows were required, Commissioner Hanson stated if no windows were installed that would not be a problem, but if they are added they should match the house.

Motion by Commissioner Hanson to approve the design review to construct a detached accessory structure within the Clark Street Historic District at 1708 Clark Street (Parcel ID 2408-32-1036-10) with the following conditions:

- All applicable building and zoning codes shall be met prior to construction.
- All required permits shall be obtained prior to construction.

- **Painting of trim, doors, and windows shall match the color scheme and design found on the home.**
- **Shingles should match exactly to those found on the existing home.**
- **Wooden double hung windows shall be installed if pursued by applicant and shall match in color of those found on the existing home.**

Commissioner Siebert asked about costs of the fabricated siding to which Mr. Ryan answered he does not have the actual cost but was informed of the price difference by the builder, and he added the maintenance of painting is less with this product as it will hold up much better.

Director Ostrowski asked what the warranties were, to which Mr. Ryan confirmed the painting is 30 years and the siding 50 years.

Seconded by Commissioner Siebert.

Commissioner Hanson added the pitch of the roof is going to match the pitch of the house, it will look like it has been there before and the integrity of the yard is still going to be protected.

Motion carried 4-0.

2. Dumpster corral design within the downtown design review district, specifically relating to the area north of Main Street, between Third Street and Strongs Avenue.

Director Ostrowski explained we had approved the layout design for the parking area behind Dunham's and between the Main Street buildings, and we are looking at a couple of options for the dumpster corals and had indicated we would bring this back to the commission. He stated there will be two corals in this area, one being in service court number 1 which will be larger and hold up to six dumpsters, whereas, coral number 2 will be very close to the current service court off of Strongs Avenue by the bus drop off area. Commissioner Siebert asked for clarification of the location of the first dumpster, to which Director Ostrowski stated it will exist one or two stores to the east of the former Andrew's behind the service court area.

Commissioner Hanson asked if this will service the stores there, and will it handle the apartments as well, to which Director Ostrowski stated Schertz uses a dumpster that he has across Third Street for apartments, so this will primarily serve businesses within the area. Agreements with business owners are still being put together. Director Ostrowski continued stating that with the design there are a couple of options; the first being brick pillar similar to the coral on the square with a brick veneer side with the dumpster going completely down to the ground; the second option is doing something with murals having the brick pillars with cinderblock sides and have mural boards fixed on them. He stated the city is looking at bidding out this project, and is looking for the direction of the committee in how to proceed. Director Ostrowski stated the brick veneer is more expensive, but the murals may match the area better, and when the mural committee had met, there was discussion regarding more historic themed murals, or maybe adding a different type of mural keeping with the historic feel to the area.

Commissioner Siebert stated the other types discussed at the mural meeting were still historically themed with either railroad history, or nationality history similar with the style of painting on the murals inside the Whiting Hotel.

Commissioner Siebert added the committee wanted to do a railroad type mural since railroads had save the city at one point back in the 1870's. Commissioner Hanson liked the idea of a railroad mural on coral number one due to the extensive size of the coral, but asked if the brick is extended all the way to the ground how would it be cleaned out. Commissioner Siebert asked if the opening would be facing Strongs Avenue. Director Ostrowski confirmed the opening would face Strongs Avenue, and explained that we will have to work with the contractor to see what options are available for that as well as possibly having a mural on the doors, or having decorative doors. Commissioner Hanson also expressed a concern for the strength of the doors due to possible vandalism at bar time, but stated he did like idea of murals on the dumpster corals. Director Ostrowski stated it will be nice to continue the murals in the downtown, but for these to be a little different, Commissioner Beveridge added the Diego Garcia style is the person who did several murals in larger cities. Commissioner Siebert added there is money and funds available to cover this in the mural fund.

Motion by Commissioner Siebert to approve the dumpster corral construction within the downtown design review district, specifically relating to the area north of Main Street, between Third Street and Strongs Avenue to be constructed with brick pillars and concrete block walls, and to give staff the authority to make minor changes regarding the exterior materials.

Commissioner Hanson asked if there were any ideas as to how cleaning of the corals would occur, to which Director Ostrowski answered the dumpsters will roll out and may have to be shoveled out and cleaned out. There will be a hole for drainages as well.

Seconded by Commissioner Hanson.

Aldersperson Mary Stroik asked if there was access for water for cleaning as well, to which Director Ostrowski stated yes there is connection to the buildings. Commissioner Hanson asked if this will be tied in to MSTC and if there will be smaller refuse containers that service the pedestrian needs, to which Director Ostrowski explained MSTC has a dumpster area around there building. Furthermore, after the pedestrian patterns are observed smaller refuse containers will be added to the area.

Motion carried 4-0.

3. Adjourn.

Meeting adjourned at 4:33 p.m.

Memo

Michael Ostrowski, Director
Community Development
City of Stevens Point
1515 Strongs Avenue
Stevens Point, WI 54481

City of Stevens Point – Department of Community Development

To: Historic Preservation / Design Review Commission
From: Michael Ostrowski and Kyle Kearns
CC:
Date: 8/14/2013
Re: Request from Marty and Kelly Kizewski for design review of exterior façade improvements and signage at **1008 Main Street (Parcel ID 2408-32-2029-20)**.

Mr. and Mrs. Kizewski are requesting design approval for work already completed to the façade at 1008 Main Street. Furthermore, they are also requesting approval of signage at the same location. Recently the Kizewski's moved their consignment shop from Plover to downtown Stevens Point. Unaware of the Downtown Historic Guidelines, the Kizewski's painted the façade (see photos below).

All proposed exterior improvements or renovation to buildings within the Downtown Historic / Design Review District must obtain Historic Preservation / Design Review approval.

DESIGN REVIEW - FAÇADE:

The building is unique in that the majority of visible materials on the first floor are not original. Glass and wood paneling line the majority of the façade on the first floor. Beige or cream colored exposed stone is visible above the wood paneling. The applicant has stated that wood was painted to match that of their business's color scheme which incorporates blue and yellow colors. Furthermore, much of the wood had chipped and faded paint. The awning, visible from the pictures, does not match that of the existing color scheme and the applicant has not pursued changing it. Staff does have concerns with the current color scheme, as it is very vibrant, and does not blend well with a majority of buildings within the downtown.

DESIGN REVIEW - SIGNAGE:

The proposed signage may be dependent upon the paint scheme as they incorporate the same colors. Photos to the right depict the previous sign and the proposed sign. The applicant has stated that removal of the old sign exposed rotted wood. Therefore, the proposed sign is proposed to be placed over existing wood. Below are details regarding the proposed sign.

Sign Details:

- Dimensions: 21' x 40"
- Approx. 70 square feet
- Aluminum
- Printed/Painted Letters

Signs and Graphics - Sign Standards

Flush Mounted Signs:

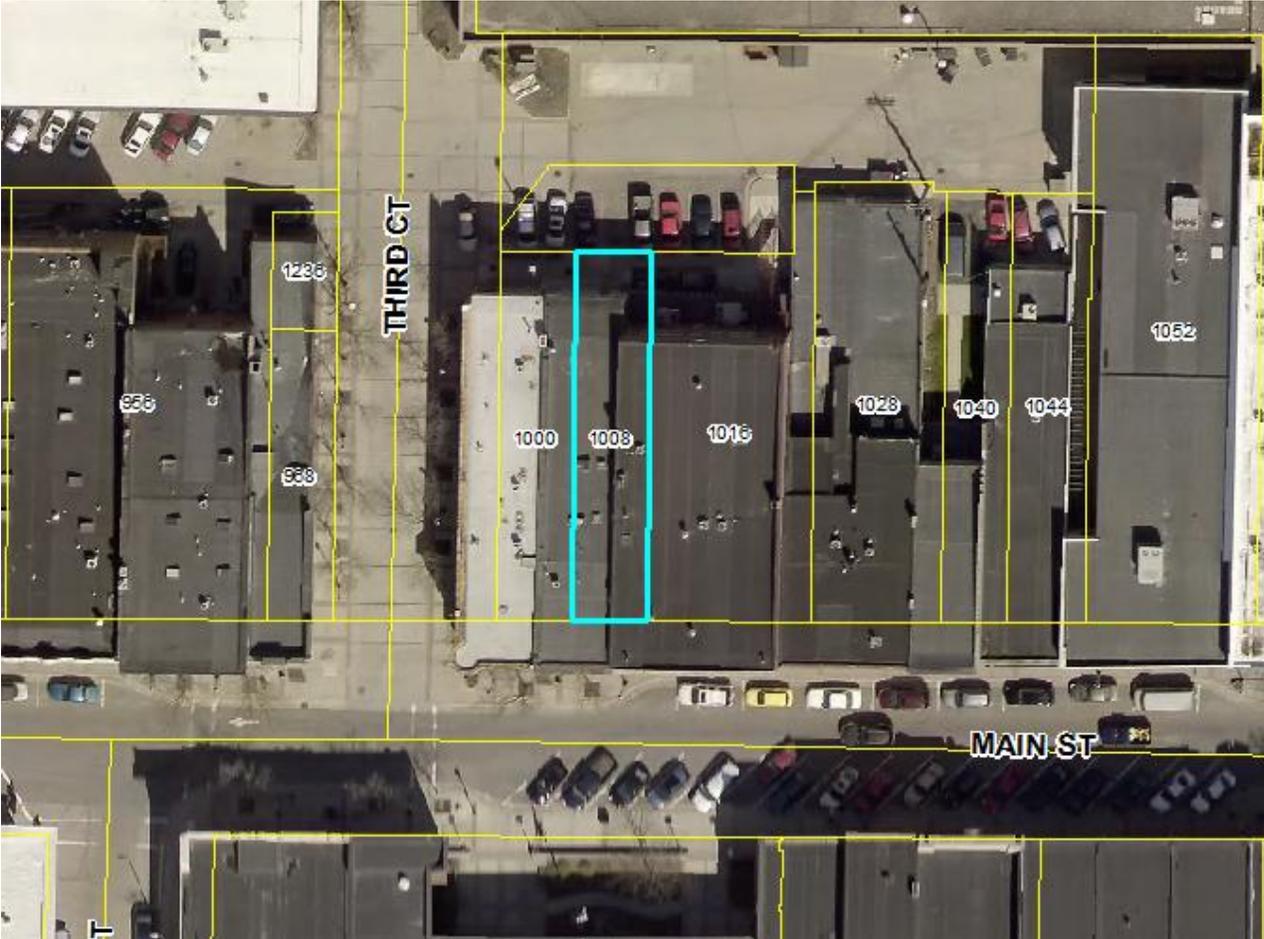

Shall be located in the "signable" wall area of a façade. The "signable" area is defined as the continuous portion of a building faced unbroken by doors or windows, below the sill line of the second story and above the storefront transoms (See Appendix A.) Signable areas shall not exceed 10% of the total façade area (ht.x wdt. Graphics within the signable area shall be limited to 40% of the total signable area where that façade faces commercial land uses and 30% of the total signable area where the façade faces residential land uses. In buildings that contain two or more businesses, the signage area may be divided to accommodate the additional businesses. All signage should be coordinated in terms of color and materials. Business directories for upper story tenants shall not exceed 8 sq. ft. in total area. Exceptions may be made based on overall design concept. Signs and graphics shall not be allowed to physically harm the architectural character of the building they are attached too.

Findings: The proposed sign meets the sign standards for wall signs within the Historic District, however the Commission can make a determination on the following:

1. Whether the proposed construction, reconstruction or exterior alteration is in conformance with architectural design guidelines with emphasis on contextual issues including compatibility of size, volume proportions, rhythm, materials, detail, colors, and expressiveness.

Staff would recommend a more appropriate sign, as proposed sign does not fit the with conformity of the downtown historic district. Additionally, staff would recommend that the rotted wood be repaired in order to prevent further damage to the stone or other material behind the wood. Lastly, staff would recommend allowing the Chairperson and designated agent the authority to work with the applicant and/or approve a sign reflective of the Commission comments, concerns, and conditions.

PROJECT SUMMARY

Address	1008 Main St. Stevens Point
Project Description	
Other Information	

City of Stevens Point, Wisconsin
 Department of Planning and Economic Development
 Planning and Economic Development

Project Name: Pass It Consignments
 Address: 1008 Main St.
 City: Stevens Point, WI

Project Description: Exterior painting and sign installation.

I began Pass It Consignments 2.5 yrs ago in Plover. However, due to Post Rd renovations, I had to be out of our building by the end of 2013. I chose to move to Main St. because my family + I have always enjoyed shopping + eating downtown. In order to look professional, the outside of 1008 Main St. needed major fixing and painting. I would like to put a large sign above windows made out of aluminum. In

order to adhere the sign, due to the extensive rot, the bigger the sign - the more secure it will be. I would not be able to just paint flat service where sign should go because of the rot. / The work done on the front has and will maintain and secure the features of the building. It was literally falling apart and warping prior to our face lift

Does the proposed work match and harmonize with the area's appearance and historic character?

I believe that each building downtown has character and charm. My proposed paint and sign would flow very well with the other buildings. 1008 Main has neutral colors above our store front so colors will not clash. The awning is a different color, however it pulls in the green from the

Does the proposed work contribute to the historic preservation of the building?

I believe so. Painting our store colors on the store front and adding a sign will not change the historic preservation of our building.

Does the proposed work contribute to the historic preservation of the neighborhood?

I believe so. We are not changing the building in any way, we are improving and correcting years of neglect.

* We have over 2000 clients who need to find us after moving to Main St. Staying with our original colors will benefit our business and downtown.

---	--

Guidelines.

- No funds shall be disbursed until project is fully completed.
- The maximum City participation shall not exceed **\$10,389.60** and no individual cost shall exceed the following, unless approval has been given to the HP/DRC chairperson and designated agent in reviewing additional bids or building improvements:

Improvements	Cost	Proposed Matching Grant Assistance
West Wall	Eisner Construction - \$4,381.49	\$2,190.745
Door	Duralum - \$1,399.26	\$699.63
Painting	Golden Sands Decorating - \$520.00	\$260.00
Windows	Eisner Construction - \$5,236.00	\$2,618.00
Awnings	Duralum - \$9,260.44	\$4,630.22
TOTAL (Lowest Bid)	\$20,797.19	\$10,389.595

Vicinity Map

Scope of Work

Jeff Brown, owner of the property in question, is requesting Façade Improvement Grant Program funds for an exterior renovation of his building at 1140 Clark Street. The applicant originally requested design review to install awnings, however chose to apply for program funds to perform additional façade work. Currently, a restaurant business for which

Mr. Brown is affiliated, operates out of the first floor. The second floor currently is used for storage. It is important to note that the building faces two facades as it is located on a corner, Clark Street and Strongs Avenue.

Major renovation and rehabilitation has been proposed to occur to the front of the façade, outlined below:

Façade Improvements & Activities:

- Install new second story residential windows along Strongs Avenue
- Install new awnings
- Remove/relocate grates, and furnace vents
- Repaint wooden boards along building façade
- Install new door along Strongs Avenue
- Install bonding cement and paint second floor west façade

***Note that the last item above does incorporate work that does not face a street or right-of-way, however, it is very visible.

All proposed improvement or renovation must obtain Historic Preservation / Design Review approval.

Standards of Review

Design Guidelines

The following standards would apply to this request:

Masonry

To the extent possible, original materials shall be retained in existing facades. They should be removed only where they are structurally unsound and are beyond restoration, and then only in accordance with an approved design scheme. Natural materials are preferred over simulated or synthetic materials. The types of material preferred, but not limited to, may include: brick, stone, wood, stucco, clay, tile, ceramic tile, quarry tile, terra cotta, and cut stone. Materials to be avoided may include, but not be limited to, concrete block, plastic, fiberglass, simulated brick, simulated stone, hardboard or metal siding panels and wood siding panels.

Analysis: The applicant is proposing to paint existing wood found primarily on the south façade facing Clark Street. A covered porch primarily constructed of wood exists and is in need of paint. Furthermore, the applicant has not yet determined the exact color. Along with painting, work to the second story west facing façade is proposed. Two bids for masonry work for the west façade have been provided. The first bid from Eisner Construction involves using a bonding cement applied to the façade with which paint will then be applied. The second bid from Ortscheid Construction involves installing an E.I.F.S system / stucco, which is much more expensive.

Findings: Staff would recommend allowing the chairperson and designated agent to work review and/or approve a color scheme at a later date, as well as, limit the painting to only existing woodwork. In regards to the proposed west façade activities, staff would reserve a recommendation until the HPDRC has reviewed the request. Typically facades must face a public street or right-of-way to qualify for façade improvement grant funds. However, the area in question is in desperate need of repair and is very visible from Clark Street.

Windows & Entryways

The original shape, proportion, and scale of window openings shall be maintained. Blocking up or otherwise closing off of an original window shall not be permitted unless deemed necessary for energy efficiency. Exceptions may be made based on overall design concept. Wooden replacement windows are encouraged, however, new metal window frames (permanent or storm) should be either painted or anodized with a finish in character with the building being renovated.

New storefront doors should match or closely resemble a traditional storefront door (i.e. contain large glass panels). Wooden replacement doors and frames are encouraged. Colonial, cross-buck or other such stylized doors are usually inappropriate in older commercial districts and shall not be permitted. Metal doors and frames (permanent or storm) should be painted or anodized with a dark finish rather than left in a natural metal finish.

Analysis: Twelve second floor windows are proposed to be installed. All twelve face Strongs Avenue which are currently boarded up. Windows are proposed to be vinyl double hung with tilt out sash in a cream color or white. Currently, second floor vinyl double hung windows exist along Clark Street. Furnace vents exist within many of the second floor windows which serve the first floor business. Therefore, the applicant is requesting to remove and relocate those vents. The proposal includes relocating vents into new building openings. Lastly, the applicant is proposing to replace a door along the lower east side of the building with a swing out 1/2 glass steel door. Details for the windows and doors are below. Two bids for the proposed window and door activities have been submitted, one by Eisner Construction and the second by Duralum, siding, windows.

Second Floor Windows:

12 - Low E, Argon, Energy Star vinyl double hung tilt out sash in cream or white color. Outside casings are proposed to be covered with coil stock or aluminum.

First floor door:

1 - 42"out swing glass and steel door.

Findings: The proposed windows are somewhat historically relevant and match that of what is currently on the building, however, vinyl windows are typically not recommended. Existing second floor windows are vinyl cream colored double hung windows. Staff would recommend allowing the installation of vinyl windows as proposed in order to match those already existing. Staff would also recommend that the color of all second floor windows match, or be painted to match. Several exhaust vents are visible on the building and those within the windows should be combined into existing vents or established on the rooftops to prevent disturbing the building's façade. Therefore, staff is recommending that the penetration of the building façade to accommodate exhaust vents shall be prohibited. In regards to the proposed door, staff is recommending at least half of the door incorporate glass, to provide a more aesthetically appealing entrance underneath the proposed awning. Furthermore, the door and framing shall match in color with those found on the main entrance of the building.

Sign / Awning Standards

Awning Signs / Canopy: Maximum graphic coverage may not exceed allowable graphics area as described under section 5.b.1. Flush mounted signs, or 25% of the total awning area, whichever is less. Graphics displayed on awning end panels shall not exceed 8 s. f. where adjacent to residential areas and 16 s. f. in commercial areas. No part of end panel graphics may extend further than 5 feet from face of building. Use of logos is encouraged

and shall be reviewed on a case specific basis. Internal illumination awning shall be opaque except area of allowable graphics. Lighting shall comply with Section 6.A. Sign Lighting. Awnings with triangular (straight) cross-sections are historically appropriate and recommended. Semi-Circular (barrel type) cross-sections shall be considered on case specific bases. Must provide a minimum of 8 foot 6 inches vertical clearance between the bottom of the awning and finished grade. Shall project a minimum of 3' 6" to provide pedestrians protection from the elements. May extend to a point not more than 2' in from face of curb or 7' from building face, whichever is less. Must be constructed of fire resistant material. No vertical supports are allowed in the public right-of-way.

Analysis: Three awnings are proposed by the applicant. Two along the façade facing Strongs Avenue, above each side door, and covering the exhaust vents (see photo above). A third awning is also proposed to exist on the main entrance to the building and wrap around the corners similar to the example provided. No graphics are proposed on the awnings. All awnings are proposed to be black. Awning details are provided below.

Awnings:

1 - Traditional awning 15' x 42" projection x 42" drop

1 - Traditional awning 8' x 42" projection x 42" drop

1 - Traditional or stationary wrap-around awning, size unknown
12" curtain drop connected to wooden covered porch

Findings: The proposed awnings meet the standards within the ordinance, however it is unclear if the third, wrap-around awning, meets them as dimensions have not been provided. Therefore, staff would recommend the applicant to submit an updated bid from Duralum Siding, Windows & Sunrooms, outlining exact costs and awning details and dimensions. Two bids for awnings have been submitted, however one bid only includes the installation of two awnings.

Façade Improvement Grant Standards

1. **The project is being proposed on an existing building within the Downtown Design Review District.**

Analysis: Jeff Brown's building located at 1140 Clark Street falls well within the Downtown Design Review District.

Findings: This standard is met.

2. **Restoration and rehabilitation of building exterior walls are viewable from a public street.**

Analysis: The south façade faces Clark Street and the east façade faces Strongs Avenue. The west façade does not face a street, however is very visible from Clark Street.

Findings: Work proposed on the west façade does not face a street and therefore is considered ineligible for façade funds, however the Commission can review request on a case by case basis.

3. **Activities proposed are part of an overall building improvement project.**

Analysis: Façade improvement activities are proposed for the southern, eastern and western façades and include new windows, door, painting, and awnings.

Findings: This standard is met.

4. Structural or decorative elements should be repaired or replaced to match or be compatible with the original materials and design of the building to the greatest extent possible.

Analysis: The majority of the work will match that of the original building, in color, style, and design. Some materials, such as vinyl window, are not compatible with the original materials. Furthermore, the proposed windows do not match those found currently on the building.

Findings: The applicant is significantly increasing the aesthetics of this building to more closely match elements of its construction era, especially the installation of 12 windows. Furthermore, the applicant is adding needed appeal to the east façade by installing awnings which will cover several exhaust vents. Overall, the applicant's proposed façade improvements will significantly help to restore lost integrity to the building and maintain many historical elements that exist. Although not every improvement activity matches the original materials and design of the building, staff feels that this standard is met, as meeting every original building characteristic would increase costs significantly.

5. Applicant has obtained more than one bid from contractors.

Analysis: The applicant has submitted two bids for every building improvement activity except for awning, specifically related to the third awning proposed over the main entrance.

Findings: Staff would recommend the applicant submit an updated bid from Duralum Siding, Windows & Sunrooms, outlining exact costs and awning details and dimensions at which time the designated agent and chairperson shall have the authority to review and/or approve the proposal.

6. Matching grant assistance shall not exceed \$30,000 dollars unless approved by Common Council.

Analysis: The total project cost estimates for bid proposals are below, along with matching grant assistance.

Improvements	Details	Cost	Proposed Matching Grant Assistance
West Wall	a. Install E.I.F.S. / Stucco Material b. Fiber reinforced bonding cement & paint	Ortscheid Cons. Inc. - \$10,584.15 Eisner Construction - \$4,381.49	\$5,292.075 \$2,190.745
Door	a. Install out swing 1/2 glass steel door b. Install out swing glass and steel door	Eisner Construction - \$1,485.00 Duralum - \$1,399.26	\$742.5 \$699.63
Painting	a. Paint all exterior wood b. Paint exterior wood with acrylic stain	Central WI Painting & Papering - \$800.00 Golden Sands Decorating - \$520.00	\$400.00 \$260.00
Windows	a. Install 12 vinyl dbl. hung windows & vent b. Install 12 tan vinyl dbl. hung windows Remove / relocate vent and exhaust	Eisner Construction - \$5,236.00 Duralum - \$9,189.74 Excel Plumbing, Inc. - \$850.00	\$2,618.00 \$4,594.87 \$425.00
Awnings	a. Install two stationary awnings b. Install three stationary awnings	Baraboo Tent & Awning - \$5,132.00 Duralum - \$9,260.44	\$2,566.00 \$4,630.22
TOTAL (Lowest Bid)		\$20,797.19	\$10,389.595

Findings: The requested assistance is \$21,670. Highlighted figures identify the lowest bid. The highlighted awning bid, "bid b" is not the lowest bid but incorporates the third proposed awning. This standard is met.

7. The applicant is current on all real estate and personal property taxes, has provided proof of insurance, and has no outstanding amounts owed to the City of Stevens Point.

Analysis: Proof of insurance has been provided. Property taxes are current there are no outstanding amounts owed to the City.

Findings: This standard is met.

8. The project meets all components outlined within the Downtown Design Guidelines.

Analysis: The design standards that apply to this request, regarding windows, doors, awning and masonry/materials are somewhat met.

Findings: The applicant requests to use vinyl windows, and which do not meet the design guidelines. Wooden windows are preferred; however vinyl windows currently exist on the south side of the building. Also, the applicant request to utilize a bonding agent to repair the west facing wall and paint afterwards. Painting of brick and filling of joints with cement is prohibited, however given the current status of the west wall which has been painted several times and is above the first floor, staff reserves any recommendation until the Commission has reviewed. It is important to note that the proposed rehabilitation work will significantly increase the historical integrity of the building. It is one of the largest buildings along Clark Street and is quite visible as it sits on a corner. Although design and materials may not entirely match the design guidelines, the Commission can approve them on a case by case basis.

9. The project conforms to all zoning regulations within Chapter 23 of the Revised Municipal Code.

Analysis: Only exterior work to the façade is being proposed. Proper building permits will be obtained.

Findings: This standard is met.

Ranking of Projects for Grant Funds

Generally, projects having the greatest aesthetic impact will be given first priority. Priority will also be given to the following:

1. Projects that will encourage other restoration or redevelopment within the downtown TIF District area.

Findings: This building is located along a main thoroughfare into Stevens Point from the west, as well as, from the south. Small maintenance activities have been made over the years however it has never gone through major exterior updates and renovations. Much of the buildings integrity was lost through the removal of windows and can now be somewhat returned with the proposed project activities. Its location next to the large Whiting Hotel and Sentry insurance facility make it somewhat seem ignored. The proposed activities will help to ignite other property owners along Clark Street to invest in their buildings.

2. Buildings where an immediate renovation will stop serious deterioration of the building's façade.

Findings: The windows along the second floor continue to deteriorate behind the boards. Furthermore, the west wall continues to deteriorate as it receives major damage from the weather.

3. Projects that improve the architectural integrity of the building and restore the historic architecture.

Findings: Twelve boarded up windows will be opened. Awnings will provide needed aesthetics to the east façade, while covering vents. Overall, much historical integrity will be restored with the proposed rehabilitation to the building.

4. Buildings where historic or architecturally significant features contributing to the building's character are in danger of being lost due to disrepair.

Findings: Like many, this building is a contributing building within the historic district. Little ornate detail exists on the building therefore, noticing boarded up windows and other flaws becomes much easier. Concurrently, noticing new windows and other added features will be easy as well.

5. Vacant properties where façade improvements would help to improve the overall appearance.

Findings: The owner currently utilizes the building for a restaurant on the first floor. The second floor is primarily used for storage, however adding windows to the second floor will increase the potential for a second use, such as residential.

6. Projects that demonstrate collaboration and will help to attract people.

Findings: It is anticipated that the renovation will attract customers to the building and business within while also appealing to developers or potential purchasers in the future.

7. Projects that will result in significant new investment and creation of jobs.

Findings: A business currently exists in the first floor. No new jobs are anticipated from the improvements.

8. Projects that incorporate mixed uses or multiple tenants.

Findings: The building offers space for one commercial tenant on the first floor with the potential for a second use above after improvement activities.

Vicinity Map

Scope of Work

Mark Grubba of M&C of Stevens Point LLC is requesting Façade Improvement Grant Program funds for an exterior renovation of his building's at 937 and 949 Main Street. The applicant operates a successful jewelry business out of 949 Main Street and leases 937 Main Street to a business. The primary reason for the request is to perform needed maintenance to the woodwork found on the front of both buildings, as well as along the roofline. Furthermore, 949 Main Street is in dire need of masonry cleaning and repair. Again, both buildings are owned by the applicant and the façade improvement request is incorporates activities and pricing for both buildings.

Major renovation and rehabilitation has been proposed to occur to the façades, outlined below:

Façade Improvements & Activities:

949 Main Street

- Grind out all open joints, and tuckpoint stone,
- Remove all rotted wood and replace,
- Paint middle and upper building cornice/ soffit,
- Paint second floor windows,
- Paint newly installed wood and existing wood
- Repair/refurbish existing "Grubba Jewelers" projecting sign.

937 Main Street

- Grind out all open joints, and tuckpoint brick,
- Remove all rotted wood and replace,
- Paint second floor windows,
- Paint newly installed wood and existing wood

All proposed improvement or renovation must obtain Historic Preservation / Design Review approval.

Standards of Review

Design Guidelines

The following standards would apply to this request:

Masonry

To the extent possible, original materials shall be retained in existing facades. They should be removed only where they are structurally unsound and are beyond restoration, and then only in accordance with an approved design scheme. Natural materials are preferred over simulated or synthetic materials. The types of material preferred, but not limited to, may include: brick, stone, wood, stucco, clay, tile, ceramic tile, quarry tile, terra cotta, and cut stone. Materials to be avoided may include, but not be limited to, concrete block, plastic, fiberglass, simulated brick, simulated stone, hardboard or metal siding panels and wood siding panels.

Analysis: Loose and chipped paint will be scraped to prep for new paint. Furthermore, existing rotted and deteriorated wood will be removed and replaced with new wood. Lastly, stone and brick joints will be cleaned, ground out, tuckpointed and/or replaced.

Findings: Ideally, renovating the building to its original condition without wooden exterior trim should be pursued, however, in doing so may cause much greater renovation activities. Therefore, staff understands the request

to maintain the existing first floor wooden façade. The color scheme requested is that found on the buildings currently. Staff would recommend that wood only be installed in place of rotted or deteriorated wood. No new wood shall be placed on the building façade at locations where stone or brick is exposed. Also, the painting scheme shall match that currently found on the buildings. In regards to the tuckpointing and cleaning, it has been several decades since 949 Main Street has received masonry attention. The stone is dirty, has open joints and will continue to deteriorate without needed attention. On the other hand, 937 Main Street is in need of little masonry work; however it is still important, as it will assist in preventing further deterioration. Staff would recommend that tuckpointing shall match to the greatest extent possible the original mortar and spacing on the building. Additionally, abrasive cleaning methods for the masonry shall be prohibited. The designated agent and chairperson shall work with the applicant to approve any cleaning method used.

Windows & Entryways

The original shape, proportion, and scale of window openings shall be maintained. Blocking up or otherwise closing off of an original window shall not be permitted unless deemed necessary for energy efficiency. Exceptions may be made based on overall design concept. Wooden replacement windows are encouraged, however, new metal window frames (permanent or storm) should be either painted or anodized with a finish in character with the building being renovated.

New storefront doors should match or closely resemble a traditional storefront door (i.e. contain large glass panels). Wooden replacement doors and frames are encouraged. Colonial, cross-buck or other such stylized doors are usually inappropriate in older commercial districts and shall not be permitted. Metal doors and frames (permanent or storm) should be painted or anodized with a dark finish rather than left in a natural metal finish.

Analysis: No new windows are proposed, however windows are proposed to be painted. The color will match that proposed for the first floor (beige/light brown). Twenty (20) second floor windows exist on 949 Main Street, four (4) along Main Street and 16 along Third Street. Four (4) windows exist at 937 Main Street, all facing Main Street.

Findings: A total of 24 windows exist between both buildings, most of which have transoms and a few which have unique detailing. Staff would recommend that second floor windows shall be painted to match the beige/light brown color proposed for the wood. Furthermore, stone window sills and stone window accents above windows shall not be painted.

Signs and Graphics - Sign Standards

Projecting Signs

Maximum sign area (ht. x wdth. of sign face) shall be limited to 8 s.f. where adjacent to residential areas and 16 s.f. in commercial areas. Must maintain a minimum 8 foot 6 inch clearance between the bottom of the sign and finished grade. May project to a point not more than 2' from face of curb or 5' from face of building, whichever is less. Shall project to a point not more than 2' in from face of curb or 5' from face of building, whichever is less. Shall project at 90 degree angle from building wall unless located at a corner. No part of a sign shall extend above the second story sill line.

Analysis: The sign is a very historic sign within our downtown, however due to weathering it has deteriorated to a point where it does not serve its purpose. It is one of a few larger neon projecting signs downtown and is remembered by several visitors. Several neon lights no longer work, paint has faded and chipped, and wiring has decayed and is in need of an upgrade. The sign meets several requirements above.

Findings: Signage can be approved as part of an overall building improvement project. Furthermore, this sign in particular is one that is unique to our downtown, therefore staff is recommending funding the request to repair and refurbish the sign.

Façade Improvement Grant Standards

1. The project is being proposed on an existing building within the Downtown Design Review District.

Analysis: Mark Grubba's buildings are located at 937 and 949 Main Street which both fall well within the Downtown Design Review District and the Mathias Mitchell Public Square Historic District.

Findings: This standard is met.

2. Restoration and rehabilitation of building exterior walls are viewable from a public street.

Analysis: 937 Main Street: The north façade faces Main Street. 949 Main Street: The north façade faces Main Street and the east façade faces Third Street.

Findings: This standard is met.

3. Activities proposed are part of an overall building improvement project.

Analysis: Façade improvement activities are proposed for both building north façade as wood paneling and colors schemes tie into both buildings. Furthermore the east façade at 949 Main Street is receiving a large amount of masonry work and painting. Lastly, the historic sign is proposed to be refurbished and repaired.

Findings: This standard is met.

4. Structural or decorative elements should be repaired or replaced to match or be compatible with the original materials and design of the building to the greatest extent possible.

Analysis: The majority of the work will match that of the original building, in color, style, and design. Wooden replacement of boards will only occur to existing wood. The proposed color scheme will be the same as the existing, and windows will be painted to match that of the proposed color scheme. Mortar and stone will match as best as possible the original or existing.

Findings: The applicant isn't significantly changing the façade of this building, but instead performing necessary maintenance and upgrades to existing building elements. Over the last several decades, the several building elements have received tremendous amounts of abuse from the weather which have led to deterioration. The applicant's proposed façade improvements will help to restore lost building integrity due to deterioration.

5. Applicant has obtained more than one bid from contractors.

Analysis: The applicant has submitted two bids for every building improvement activity except for masonry activities.

Findings: Typically as tuckpointing is such a rare and unique trade, staff would recommend approving the single bid; however, because of the great extent of masonry work proposed, staff would require a second masonry bid to be reviewed and/or approved by the chairperson and designated agent.

6. Matching grant assistance shall not exceed \$30,000 dollars unless approved by Common Council.

Analysis: The total project cost estimates for bid proposals are below, along with matching grant assistance.

Improvements	Details	Cost	Proposed Matching Grant Assistance
Masonry	a. Remove bad joints & tuckpoint	Don Dulak & Son Masonry Inc - \$35,800.00	\$17,900.00
Painting	a. Scrape, prime & paint cornice & wood	Bill Wanserski - \$9,755.00	\$4,877.50
	b. Scrape, prime & paint soffits, windows & wood	Tom's Painting - \$6,900.00	\$3,450.00
Wood	a. Remove deteriorated wood and replace	Bill Wanserski - \$2,840.00	\$1,420.00
	b. Remove rotted wood and replace	SRS Construction - \$866.00	\$433.00
	c. Replace all rotten wood	Tom's Painting - \$1600.00	\$1600.00
Signage	a. Fix existing sign: neon, paint, wire	Rapids Sign - \$7,900.00	\$3,950.00
	b. Install three stationary awnings	Bushman Electric Crane & Sign - \$7,100.00	\$3,550.00
TOTAL (Lowest Bid)		\$50,666.00	\$25,333.00

Findings: The requested assistance is \$25,333.00. This standard is met.

7. The applicant is current on all real estate and personal property taxes, has provided proof of insurance, and has no outstanding amounts owed to the City of Stevens Point.

Analysis: Proof of insurance has been provided however it does not show current coverage. Property taxes are current there are no outstanding amounts owed to the City.

Findings: Staff would recommend that the applicant submit proof of insurance showing current coverage.

8. The project meets all components outlined within the Downtown Design Guidelines.

Analysis: The design standards that apply to this request, regarding windows, doors, signage and masonry/materials are met.

Findings: This standard is met.

9. The project conforms to all zoning regulations within Chapter 23 of the Revised Municipal Code.

Analysis: Only exterior work to the façade is being proposed. Proper building permits will be obtained if necessary.

Findings: This standard is met.

Ranking of Projects for Grant Funds

Generally, projects having the greatest aesthetic impact will be given first priority. Priority will also be given to the following:

1. Projects that will encourage other restoration or redevelopment within the downtown TIF District area.

Findings: The buildings are located along Main Street in the heart of downtown. Furthermore, both businesses operating out of the buildings have been in business for several years or decades. Although the first floor façades have a wooden façade, it offers a unique feature which most likely covers unappealing building features. Lastly, 949 Main Street sits at a corner which has much more visibility, not to mention the existing historic sign which draws attention. There is no doubt that the proposed façade improvement activities will encourage other restoration projects downtown.

2. Buildings where an immediate renovation will stop serious deterioration of the building's façade.

Findings: The sign, wood, and masonry have all received deterioration from weather. Furthermore, it has been decades since the sign and masonry have received serious attention. The deterioration and decay will continue if proposed activities do not occur.

3. Projects that improve the architectural integrity of the building and restore the historic architecture.

Findings: Brick work will improve the architectural integrity through the filling of mortar and tuckpointing corners. Several stones are discolored (see photo) and have large joints. Additionally the previous color scheme is proposed for the windows, cornice and wood. As mentioned earlier, restoring the building to its original character would be ideal, however may be much more costly as it is unknown what exists behind the wood paneling. Overall, much historical integrity will be restored with the proposed rehabilitation to the buildings.

4. Buildings where historic or architecturally significant features contributing to the building's character are in danger of being lost due to disrepair.

Findings: Like many, these buildings are contributing structures within the historic district. The second floor retains a greater amount of original detail, including corbelling and a metal cornice complete with brackets. Original design elements on the first floor are absent as it is covered in wood and windows, except along the east façade of 949 Main Street. All design elements on the second story will be preserved. Proposed project activities on the first floor will match to the previous design.

5. Vacant properties where façade improvements would help to improve the overall appearance.

Findings: The property's have tenants in the second floor renting apartments. The first floor of both buildings is occupied by long standing successful businesses.

6. Projects that demonstrate collaboration and will help to attract people.

Findings: It is anticipated that the renovation will attract customers to the buildings and businesses within.

7. Projects that will result in significant new investment and creation of jobs.

Findings: No new permanent jobs will result from the proposed project.

8. Projects that incorporate mixed uses or multiple tenants.

Findings: Both buildings offer space for commercial tenants on the first floor with the potential for residential tenants above.

Customer: GRUBBA JEWELERS
Job: REFURBISH BUILDING SIGN
Date: 7-17-13

We hereby submit specifications and estimates to:

Refurbish existitng GRUBBA JEWELERS projecting neon sign including repainting, repair of neon, wiring, transformers as necessary.

- Replace broken neon letters in "JEWELERS" ("JE" on west side/"ERS" on east side)----- \$ 780.00
- Replace yellow neon borders and white circles on both sides of sign: ~~"DIAMONDS"~~----- \$ 920.00
- Replace ALL neon on sign for consistent color/brightness (including above items)----- \$ 3,950.00
- Repaint entire sign cabinet with original lettering/color scheme;
sign would need to be removed for repainting and reinstalled----- \$ 2,150.00
- Neon transformer replacement (as necessary, up to two)----- \$ 300.00 each
- Replace/Repair misc wiring issues, neon housings, stands, etc----- \$ 400.00

PRICE TO COMPLETELY REFURBISH SIGN (NOT TO EXCEED) \$ 7,100.00 + ~~Tax~~

** Prices based on use of existing aluminum cabinet. Upon survey, structure appears to be in good shape without any reinforcing necessary. If any work is found to be needed on the cabinet, mounting brackets, etc., upon removal of sign, it will be an additional cost; no additional work will be done without consent of customer.

**50% deposit required upon acceptance of agreement.
Balance due 10 days after job.**

AS REQUIRED BY THE WISCONSIN CONSTRUCTION LIEN LAW, BUILDER HEREBY NOTIFIES OWNER THAT PERSONS OR COMPANIES FURNISHING LABOR OR MATERIALS FOR THE CONSTRUCTION ON OWNERS LAND MAY HAVE LIEN RIGHTS ON THAT LAND AND ON THE BUILDING ON THAT LAND IF THEY ARE NOT PAID FOR SUCH LABOR OR MATERIALS. THOSE ENTITLED TO LIEN RIGHTS, IN ADDITION TO THE UNDERSIGNED BUILDER, ARE THOSE WHO CONTRACT DIRECTLY WITH THE OWNER OR THOSE WHO GIVE THE OWNER NOTICE WITHIN 60 DAYS AFTER THEY FIRST FURNISH LABOR OR MATERIALS FOR THE CONSTRUCTION, AND SHOULD GIVE A COPY OF EACH NOTICE RECEIVED TO HIS MORTGAGE LENDER, IF ANY. BUILDER AGREES TO COOPERATE WITH THE OWNER AND HIS LENDER, IF ANY, TO SEE THAT ALL POTENTIAL LIEN CLAIMANTS ARE DULY PAID. A FINANCE CHARGE IS COMPUTED ON A PERIODIC RATE OF 1 1/2% PER MONTH WHICH IS AN ANNUAL PERCENTAGE RATE OF 18% ON ANY PREVIOUS BALANCE NOT PAID WITHIN 30 DAYS.

TERMS OF PAYMENT: Materials on job site and progressive labor payments or other prearranged terms.

Acceptance of Proposal - The above prices, specifications and conditions are satisfactory and are hereby accepted. You are authorized to do the work as specified. Payment will be made as outlined above.

Date of Acceptance:

note: This proposal may be withdrawn by us if not accepted within _____ days.

Stevens Point, Wi. 54481

ESTIMATE

This is an estimate for work to be performed at the above address.

Replace rotted and damaged wood accents on the store front and sides with 3/4" cedar boards. These boards will be routed to match existing boards. Cedar boards will be primed both sides by a painter after they are made. The cedar will then be installed .

* Any additional plywood found to be rotten behind the accent boards will be at an additional cost of \$45.00 per sheet (4x8) and is to be primed before installation.

All work to be performed in a professional and timely matter. Any changes to the above estimate will be in writing and agreed upon by both parties.

Total materials and labor \$866.00

Thank you for allowing SRS Construction Services to bid on your project.
All permits are to be secured by Grubba Jewelers.

City of Stevens Point – Department of Community Development

To: Historic Preservation / Design Review Commission
From: Michael Ostrowski and Kyle Kearns
CC:
Date: 8/14/2013
Re: Determination of Eligibility (DOE) submission of potential historic districts or sites to the Wisconsin Historical Society regarding the Business 51 road reconstruction project.

The City of Stevens Point has contracted with AECOM to perform necessary analysis and studies regarding the business 51 road reconstruction project. Most recently they performed determinations of eligibility (DOE) forms for the following districts and or sites that are or have been recommended eligible for the National Register of Historic Places:

1. Pine Street - Plover Street District
2. Clark Street - Main Street District
3. Soo Line Locomotive 2713

During the planning process for the road reconstruction project, the Wisconsin Department of Transportation must consider the districts and locomotive above as if they were listed on the National Register of Historic Places. The districts above were recently identified in the City's 2011 Intensive Survey which again, has prompted these DOE's. Furthermore, much of the information presented within the DOE's came directly from the Survey, only summarized. The State Historical Society will review them only after the HP/DRC has had adequate time to review and express concern or comment. Review occurs to ensure the road reconstruction project will have no adverse affects on the districts, sites or potential districts. Furthermore, they are reviewed to evaluate and determine National Register criteria for districts and/or structures.

Staff has reviewed the three determinations of eligibility forms and has no concerns at this time, but has reached out to AECOM to request information. Maps for each of the identified districts and/or sites are attached, along with the cover letter. Full DOE's will be provided at the meeting.

RE: DETERMINATIONS OF ELIGIBILITY RESULTS
BUS 51 Reconstruction: South City Limits to I-39
City of Stevens Point, Portage County
WisDOT #6998-13-00

Commission members,

Enclosed are Determination of Eligibility (DOE) forms for the Pine Street-Plover Street and Clark Street-Main Street historic districts and Soo Line Locomotive 2713. The districts were recommended eligible for the National Register of Historic Places with regard to Criterion C: Architecture as outstanding collections of various architectural styles built in Stevens Point from the 1860s to the 1960s. The locomotive was recommended eligible under Criterion C: Engineering as an outstanding and intact example of a steam locomotive.

These determinations do not mean that the districts and the locomotive are listed in the National Register; it only means that the Wisconsin Department of Transportation as part of its planning process must consider the districts and locomotive as if it were listed. These DOEs have not yet been reviewed by the Wisconsin Historical Society and they will not be considered complete until that takes place. If the commission has any concerns that it would like to express to the WHS, please provide them to me and I will forward them to that agency.

Please contact me at 262-251-7792 or bfaltins@hrltd.org if you have any questions regarding these DOEs. If you have any questions regarding design aspects of the project, please refer those to the project engineer, Mr. Bruce Gerland, P.E. of AECOM at 715.342.3010.

Sincerely,

Brian J. Faltinson, M.A.
Project Manager & Historian
