1. Work on the development of wards/districts in the city.

The Committee reviewed maps from Mr. Moe and Mr. Lemke to use as starting points based on the Committee's previous recommendations. The members then worked on the maps and discussed process and how to create the wards/districts while keeping in mind supervisory districts.

Mr. Riley reemphasized that the Committee should try to keep the districts as similar as possible to the existing ones taking into consideration the shift in population.

Mr. Molepske noted the City can create wards smaller than 600 if needed to create county supervisory districts.

Mr. Moe and Mr. Lemke will make changes to the maps and present them again to the Committee at the next meeting.
