Dear local official,

The City of Stevens Point has begun efforts for the design of city-wide bicycle transportation network improvements. These improvements will include the installation of 13.16 miles of marked and signed bicycle lanes, urban shoulders, and shared lane markings on existing collector and aerial streets. The City has been awarded grant funds to make these improvements from the Wisconsin Department of Transportation through the Transportation Alternatives Program (TAP). A map showing the location of these improvements is attached.

The City will be holding a Local Officials Meeting to provide information about the study and obtain input to assist in the design of future improvements. You are invited to attend the meeting scheduled for:
